Experience

Web Designer 2006–Present
AYC Media Conshohocken, PA

Front-end development of over 150 websites creating the HTML, CSS and JavaScript for each. Created JavaScript functionality to be resused on the other sites being developed by the other employees. Assisted with designing of websites and branding for clients. Helped guide website designs to ease development and ensure usability.

Projects

Ironshore RIMS Display

Adobe AIR program created in ActionScript 3 for kiosks at a trade show event. Created as a means to gather contact information on potential clients, the display featured scripted animation and functionality.

Hey Philly
www.heyphilly.com

Online photo gallery focusing on Philadelphia nightlife. Featuring a responsive dynamically created layout to bring as much attention to the photos as possible while maintaining optimal performance.

AYC Media
www.aycmedia.com

Company website and portfolio. Designed as a single page horizontal scrolling site. The site was built as several individual pages that are dynamically load through JavaScript for ease of updating and search engine optimization.

Public House Investments
www.publichouseusa.com

Website template for multiple bars and restaurants. Created as a single system that manages 18 websites, each with their own content and branding. The sites also have separate mobile versions that allow for the users to get the most important information quickly without have the use the full site.

Education

Philadelphia University 2007
Bachelor of Science Digital Design
